

## D753E3.GEN

Engine	D753E3.GEN
Displacement (l)	2.1
Cylinders	3 l
Injection	Mech.
Max Power (1500rpm)	23 kW
Max Power (1800rpm)	26 kW
Weight	230 Kg
Emission	Stage IIIA

The **D753E3.GEN** is a 4-stroke, naturally aspirated diesel engine with direct injection and mechanical pump.

This water-cooled engine is suitable for use in the most difficult climatic conditions thanks to its **reliability, simplicity of use and ease of maintenance**. The **reduced fuel consumption and noise levels** which characterize this engine are appreciated by end-users, as are its **compact dimensions** which make the engine **easy to install**.

The GEN version includes the starter motor, battery charger alternator, radiator & fan with protective shields, filters and water/oil sensors and can be coupled with any alternator. It is Stage IIIA emissions compliant.

A wide range of optional accessories makes it possible to personalize the product to meet the end-user's requirements.
