

D753TE3.MTP

Engine	D753TE3.MTP
Displacement (l)	2.2
Cylinders	3 l
Injection	Mech.
Max Power	41.2 kW/ 56 HP @ 2300 rpm
Torque	180 Nm/18.3 kg @ 1800 rpm
Weight	245 Kg
Weight	Stage IIIA

The **D753TE3.MTP** is a 4-stroke diesel engine with direct injection, mechanical pump and turbocharger.

This water-cooled engine is suitable for use in the most difficult climatic conditions thanks to its **reliability, simplicity of use and ease of maintenance**. The **reduced fuel consumption and noise levels** which characterize this engine are appreciated by end-users, as are its **compact dimensions** which make the engine **easy to install**.

The MTP version includes the starter motor, battery charger alternator, radiator & fan with protective shields, filters and water/oil sensors. It is Stage IIIA emissions compliant.

A wide range of optional accessories makes it possible to personalize the product to meet the end-user's requirements.
