

D756IPE2.MTP

Engine	D756IPE2.MTP
Displacement (l)	4.5
Cylinders	6 l
Injection	Mech.
Max Power	102 kW/ 139 HP @ 2300 rpm
Torque	613 Nm/62.5 kg @ 1200 rpm
Weight	425 Kg
Emission	Stage II

The **D756IPE2.MTP** is a 4-stroke diesel engine with direct injection, mechanical pump and turbocharger and intercooler to optimize performance and fuel consumption.

This water-cooled engine is ideal for use in the most difficult climatic conditions thanks to its **reliability, simplicity of use and ease of maintenance. The reduced fuel consumption and noise levels** which characterize this engine are appreciated by end-users, as are its **compact dimensions** which make the engine **easy to install**.

The MTP version includes the starter motor, battery charger alternator, radiator & fan with protective shields, filters and water/oil sensors. It is Stage II emissions compliant.

A wide range of optional accessories makes it possible to personalize the product to meet the end-user's requirements.
