

## R753EU6

Engine	R 753 EU6
Displacement (l)	2.2
Valves	3 1
Injection	Common rail
Max Power	60 kW/ 80 HP @ 3000 rpm
Torque	220 Nm/22.4 kg @ 1400 rpm
Weight	225 Kg
Emission	EUROV / Stage IV

The **R753EU6** is a 4-stroke diesel engine with electronically controlled common rail direct injection, turbocharger and intercooler to optimize performance and fuel consumption. This water-cooled engine is suitable for use in the most difficult climatic conditions thanks to its **reliability, simplicity of use and ease of maintenance. The reduced fuel consumption and noise levels** which characterize this engine are appreciated by end-users, as are its **compact dimensions** which make the engine **easy to install**.

The exhaust gas treatment system (DOC & DPF+SCR) enables the engine to meet the stringent Euro VI emissions standards for on-road vehicles.

A wide range of optional accessories makes it possible to personalize the product to meet the end-user's requirements.
