

R754EU6

Engine	R 754 EU6
Displacement (l)	3
Cylinders	4 l
Injection	Common rail
Max Power	84 kW/ 112 HP @ 3000 rpm
Torque	420 Nm/42.8 kg @ 1100 rpm
Weight	260 Kg
Emission	EUROV / Stage IV

The **R754EU6** is a 4-stroke diesel engine with electronically controlled common rail direct injection, turbocharger and intercooler to optimize performance and fuel consumption. This water-cooled engine is suitable for use in the most difficult climatic conditions thanks to its **reliability, simplicity of use and ease of maintenance**. The **reduced fuel consumption and noise levels** which characterize this engine are appreciated by end-users, as are its **compact dimensions** which make the engine **easy to install**.

The exhaust gas treatment system (DOC & DPF+SCR with cooled EGR) enables the engine to meet both the stringent Euro VI emissions standards for on-road vehicles and Stage IV for mobile off-road vehicles, thereby confirming the versatility of the product.

A wide range of optional accessories makes it possible to personalize the product to meet the end-user's requirements.
