

R756IE3.MTP

Engine	R756IE3.MTP
Displacement (l)	4.5
Cylinders	6 l
Injection	Common rail
Max Power	105 kW/ 143 HP @ 2300 rpm
Torque	500 Nm/50.9 kg @ 1400 rpm
Weight	425 Kg
Emission	Stage IIIA

The **R756IE3.MTP** is a 4-stroke diesel engine with electronically controlled common rail direct injection, turbocharger and intercooler to optimize performance and fuel consumption. This water-cooled engine is suitable for use in the most difficult climatic conditions thanks to its **reliability, simplicity of use and ease of maintenance**. The **reduced fuel consumption and noise levels** which characterize this engine are appreciated by end-users, as are its **compact dimensions** which make the engine **easy to install**.

The MTP version includes the starter motor, battery charger alternator, radiator & fan with protective shields, filters and water/oil sensors. It is Stage IIIA emissions compliant.

A wide range of optional accessories makes it possible to personalize the product to meet the end-user's requirements.
