

## SUN3105E2.MTP

Engine	SUN3105E2.MTP
Displacement (l)	3
Cylinders	3 1
Injection	Mech.
Max Power	36 kW/ 49 HP @ 2300 rpm
Torque	175 Nm/17.8 kg @ 1500 rpm
Weight	312 Kg
Emission	Stage II

The **SUN3105E2.MTP** is a 4-stroke, naturally aspirated diesel engine with direct injection and mechanical pump.

This air-cooled engine is suitable for use in the most difficult climatic conditions thanks to its **reliability, simplicity of use and ease of maintenance**. The **reduced fuel consumption and noise levels** which characterize this engine are appreciated by end-users, as are its **compact dimensions** and absence of a water-cooled cooling circuit which make the **engine easy to install**.

The MTP version includes the starter motor, battery charger alternator, filters and oil sensor. It is Stage II emissions compliant.

A wide range of optional accessories, including a manual starter kit, makes it possible to personalize the product to meet the end-user's requirements.
